SUMMARY

Results-driven Data Analyst with a Master's in Advanced Data Analytics and 4 years of experience transforming complex datasets into actionable business insights. Proven expertise in statistical modeling, predictive analytics, and data visualization using Python, SQL, Tableau, and Power BI. Successfully reduced prediction errors by 35%, improved operational efficiency by 30% through automation, and delivered data-driven solutions that increased system performance by 15%. Strong collaborator with cross-functional teams, skilled in stakeholder management and translating technical findings into strategic recommendations.

TECHNICAL SKILLS

Programming & Analytics: Python, SQL, R, Statistical Analysis, Predictive Modeling, Machine Learning, Data Mining, A/B Testing

Data Visualization: Tableau, Power BI, Looker, Excel (Pivot Tables, VBA, Advanced Formulas), Jupyter Notebook

Database Management: MySQL, PostgreSQL, NoSQL, MongoDB, Data Warehousing, ETL Processes

Cloud Platforms: Google Cloud Platform (GCP), AWS (S3, EC2), Snowflake

Tools & Technologies: Git, Docker, APIs, CI/CD Pipelines

Machine Learning: Logistic Regression, XGBoost, LSTM, Random Forest, SARIMA, Prophet, DBSCAN, Hyperparameter Tuning

Business Intelligence: KPI Development, Dashboard Design, Data Storytelling, Business Requirements Analysis, Strategic Planning

Certifications: Data Science Green Belt, CCNA, CCNP, Cisco DevNet Associate

Skills: Stakeholder Management, Cross-functional Collaboration, Team Leadership, Decision-Making, Project Lifecycle

PROFESSIONAL EXPERIENCE

Graduate Teaching Assistant | University of North Texas, Denton, TX

June 2024 – May 2025

- Mentored over 250 students on topics such as model evaluation, performance optimization, and hyperparameter tuning, leading to improved understanding and application in courses like Deep Learning and Advanced Data Analytics
- Conducted hands-on lab sessions on Google Cloud Platform (GCP) covering VM deployment, model implementation, and Vertex AI, improving student cloud readiness and technical efficiency by 15%
- Facilitated office hours and instructional sessions to clarify complex statistical and machine learning concepts, enhancing hands-on experience with predictive modeling frameworks.

Consulting Engineer - II | Cisco Systems India Pvt. Ltd., Bangalore, India

August 2020 – June 2023

- Conducted data-driven root cause analysis to troubleshoot and resolve critical network and server challenges in collaboration with cross-functional teams; reduced downtime by 20% and maintained uninterrupted service delivery
- Leveraged Splunk dashboards and SPL queries to monitor real-time system performance data across 50+ enterprise servers; created automated alert triggers for anomalies, enabling proactive issue detection
- Built Python automation using Cisco REST APIs to pull configuration data, interface statistics, and neighbor information from 60+ devices; transformed raw API responses into structured CSV/JSON format; created scheduled SQL inserts to populate data warehouse, enabling historical trend analysis
- Engineered Python scripts utilizing Splunk API integration to automate log data extraction and preprocessing; implemented regex-based field parsing to normalize unstructured data, enabling accurate downstream analysis

Consulting Engineer Intern | Cisco Systems India Pvt. Ltd., Bangalore, India

January 2020 – June 2020

- Built Splunk data pipeline fetching and parsing real-time syslog data from 150+ Cisco devices and created SPL queries detecting critical system events and triggering automated mobile alerts; enabled mobile-based incident response reducing mean network downtime by 35% and improving incident remediation speed by 20%
- Analyzed Wireshark packet captures statistically; identified root causes of 8 network incidents improving troubleshooting efficiency by 25%

PROJECT

Stock Price Prediction Using Sentiment Analysis:

- Developed a comprehensive stock prediction system employing multiple models including Logistic Regression, XGBoost, RNN and LSTM achieving best model accuracy of over 88%.
- Optimized model performance by 15% through cross validation techniques, hyperparameter tuning and integrated sentiment analysis for news for better model performance and more robust predictive output.

ML-Based Crime Forecasting & Emergency Response Optimization

- Processed and cleaned a 1.3M+ row dataset from the Dallas Open Data Portal which reduced prediction error by 35% and engineered complex features like date-time, seasonality and geospatial variables, leveraging geospatial analysis with DBSCAN and Folium to design and visualize crime hotspots.
- Developed, implemented and compared diverse forecasting models including SARIMA, Prophet, LSTM, Random Forest for crime trends prediction, with top model demonstrating an accuracy of over 85%.

EDUCATION

Master of Science in Advanced Data Analytics | University of North Texas, Denton, TX

May 2025 | GPA: 3.9/4.0

Relevant Coursework: Statistical Analysis, Machine Learning, Predictive Modeling, Data Visualization, Big Data Analytics, Deep Learning, Managing Analytical Projects.
